Convergence and Divergence in the Interpretation of Quranic Polysemy and Lexical Recurrence

Abstract. The question of using synonyms in translating the Quran is a thorny issue that led to both different interpretations and different translations of the holy text. No matter how accurate or professional a translator attempts to be, Quranic translation has always been fraught with inaccuracies and the skewing of sensitive theological, cultural and historical connotations owing to the peculiar mechanism of stress, semantico-syntactic ambiguity, prosodic and acoustic features, the mesh of special rhetorical texture and culture-bound references. Consequently, in most of the English interpretations of the Quran, cases of non-equivalence and untranslatability will be more frequent with plenty of scope for ambiguities, obscurities and fuzzy boundaries. The trend has been to accept exegetical translation based on commentary and explanation of the Quranic discourse. Since there is no uniform book of exegesis, translations are considered to be glosses or approximates for non-Arabic speaking Muslims.

This study is mainly concerned with assessing the criteria and strategies used by different Quran translators in selecting synonyms to render Quranic polysemous words. The linguistic-cultural context of the original polysemous ST word will be analyzed and compared with its TT near-synonyms. The study argues that in translating religious texts where synonyms are usually used to convey implicated meanings of ST polysemous words and where we seek to have the same effect on the Target Language receiver as that of the original, the use of functional ideational equivalence is given primacy over formal equivalence.

Key Words: convergence, divergence, interpretation, polysems, synonyms, recurrence, exegesis.

Introduction

Translators of sensitive texts such as religious scripture operate in contexts which can foster ambiguity, contradiction and misunderstanding, all of which are resolvable only in relation to the context and background of each particular verse. The notion of impartiality and neutrality has long been a crucial ethical controversy. As early as the third century BC, the translation of the Torah was never considered satisfactory partly because there was no standard original manuscript and translators freely included paraphrases and exegetical material. Generally speaking, early scripture translations were not read as texts in their own right but rather as aids to comprehension (Baker, 1998, pp.269–70). This paper propounds an alternative view whereby instead of encouraging translators to remain invisible, it calls for the recognition of the crucial role of the translator's interactive involvement in selecting the appropriate exegetical interpretation. In case of the Quran, the translator will often be confronted with culture-bound expressions that lead to coherence shifts in the TT reader perception. The translator's task is to fill any cultural void that may impede the TT readers' interpretability of the TT. Consequently, many translators of the Quran resort to paraphrases, intertextual insertions and lengthy introductions and footnotes in order to bridge cultural gaps and thereby reduce TT coherence shifts.

Most translations of the Quran are source language oriented; because of the sensitive nature of the Holy text, accommodating TT readers is not an option (Baker, 2001, p.201). Therefore, translations of religious texts are characterized by formal overloading (Nida, 1981, p.71), archaism and over adherence to SL lexical peculiarities such as repetition and synonymy. Such are the traits of the translations by Bell (1937), Pickthall (1969), Arberry (1980), Asad (1980) and Ali (1983) whose aim was to maintain the rhetorical strategies and mystical effects of the Holy Scripture. Communicative translations using contemporary 'simple' English were used in the translations by Akbar (1978), Irving (1985) and Turner (1997) with the aim of making the translations intelligible to the masses and the young generation.

No matter how accurate or professional a translator attempts to be, Quranic translation has always been fraught with inaccuracies and the skewing of sensitive theological, cultural and historical connotations owing to the peculiar mechanism of stress, semantico-syntactic ambiguity, prosodic and acoustic features, the mesh of special rhetorical texture and culture-bound references. In order to select the best synonym for a given context or verse a translator has to refer to major Quranic exegeses in order to understand the underlying implication of a word, conjunction or even particle. Consequently, different exegetical analyses have led to variations in the choice of 'synonymous' yet not exactly identical lexical items in the target language. In view of the culture-bound schemata of the Quran, covert translation variations (or errors) are only discernible when various translations are compared with the original and its exegeses.
The question of whether or not the Quran uses synonymy is a very thorny issue that invites both different interpretations and different translations of the holy text. By definition, synonymous words should be substitutable in the utterance without affecting their conceptual meaning (Lyons, 1968, p.446). Yet, despite cases of overlap in their core meaning, linguistic semantics dictate that there should be no absolute synonymy among words for that will result in a breach of the economy of language. Larson (1984, p.73, 57) notes that there are sets of words which are synonymous in their fuzzy core meaning even though each may contain subtle positive or negative overtones. One may be more formal and another less formal; one word may be appropriate in one situation and the other appropriate in a different situation. Accordingly, an exact translation is probably impossible for every rendition will omit some sense or express some other possibly unwanted sense. Faithful translation, therefore, requires a sophisticated corpus-based lexical choice that can determine which of the synonyms provided by one language for a word in another language is the closest or most appropriate in any particular situation (cf. Edmonds & Hirst, 2002).

This will naturally entail that upon transferring synonyms in between different languages we should expect partial synonymy instead of exact equivalence. Even words that are assumed to be translation equivalents differ in the degree of their distance from or proximity to the stem meaning. In order to avoid obscure renditions translators may prefer to explicate by rendering one word of the source language by several words in the receptor language as a means of disambiguating ST meanings. In sensitive texts such as the Quran, translations represent “varying degrees of paraphrase” (Nida, 1997, p.95). Coupled with exegetical inaccuracies of the contextual and connotative meanings, cases of non-equivalence and untranslatability will be more frequent. This is particularly true when we consider semantic and lexical gaps that may exist in the TL for the SL cultural and linguistic peculiarities, ethnic practices, historical references as well as the stylistic and figurative aspects. Therefore, it is not uncommon to find cases of class, unit and structure shifts to compensate for the TL’s voids (Catford, 1965, pp.76–9).

Divergence in transposing the possible connotations and synonyms of ST words is a common feature of Quranic translations. Robinson (1996, p.4) remarks that Quranic translations are sometimes inconsistent in rendering a given word in a variety of different ways that makes it difficult for the reader to appreciate the coherence of individual suras and that of the Quran as a whole. Such variations in translation reflect the different ways of understanding the Quran and its exegeses by different translators. Therefore, our study will assess the interpretations of five of the best known translations of the Quran in terms of their effective rendering of polysemy, synonymy and recurrence into the target language (TL). These translations were carried out by Ali (1973) Translation of the Meanings of the Glorious Quran, Pickthall (1930) The Meaning of the Holy Quran, Asad (1980, 2003) The Message of the Quran, Shakir (1962) The Holy Quran and Arberry (1980) The Koran Interpreted.

The difficulties of translating the Quran spring not only from the variations in the connotations of the selected synonyms but rather from infringing upon the rapport between sound and meaning which is a hallmark feature of the holy text both at the micro and macro levels. Therefore, a pragmatic translation of the meanings of the Quran would give approximate linguistic and rhetorical patterns for communicative purposes without claiming to be a true translation of the underlying subtleties of the original. Unlike redundant synonyms and recurrences in political texts, synonymous expressions in the Quran are used to convey certain implicated meanings which can only be rendered efficiently if the translator resorts to communicative functional equivalence. This is why Quranic ‘translations’ are often annexed with footnotes and marginal explanations to disambiguate the original meaning and supplement the translation with other possible interpretations.

This study is mainly concerned with how different translators dealt with Quranic words that seem to represent a case of synonymy. The study investigates the strategies used by different Quran translators in translating these words in selected verses, and analyzes the contexts where each pair occurs with a view to evaluating these translations. The linguistic-cultural context of the original synonyms will be analyzed whereby selected parallel translations of pairs of near-synonyms in the Quran are compared.

Functional Recurrence

Recurrence is a form of lexical cohesion achieved through the reiteration of a lexical item by way of using complete or partial recurrence, synonyms, near-synonyms, superordinates or collocations (Halliday, 1985, p.310; Halliday & Hasan, 1976, p.278). Arabic uses recurrence as one of the most important devices of textual cohesion and rhetoric while English avoids repetition by using substitution, ellipsis or references (Aziz, 1998, p.107). Despite the presence of cases of tautology and prolixity in Arabic poetry and literature, not all instances of recurrence are semantically redundant in the TT. In the translation of Holy Books and religious texts where translators should preserve the same functions and effects of the Holy Scripture, a lexical item repeated in the same context must be correspondingly repeated in the TT unless the original is poorly or loosely written (Newmark, 1981, p.147).

Deliberate motivated recurrence of a word in the same text with certain functions contributes to the efficiency of a text (de Beaugrande and Dressler, 1981, pp.134–5). This study is mainly concerned with motivated ‘informative’ recurrence in the Quran that serves a specific function such as establishing a pervasive motif, emphasizing a certain concept (e.g. praise, guidance, warning, and intimidation) or explicating an ambiguous context. One key method of deciphering the function of a recurrent phrase or lexical item is to look for polysemous words that may be repeated with variant nuances in each case. When no compatible polysemous nuances exist
in English the use of recurrence in the TT may lead to a monotonous literal repetition that loses the impressive style of the Quran. In such cases, other translation strategies, such as using footnotes, paraphrases, substitution, translation couples may be introduced (Hannouna, 2010, p.109). Sometimes, translators will resort to the use of synonyms to avoid repetition, clarify the meaning of another lexical item or provide additional comments about the topic.

The analyses of recurrence cases in the present study indicate that the translations of the Quran by Ali, Asad and Irving show less repetition and more annotation. They focus on reflecting the function of repetition by using more varieties of words and meanings and giving primacy to the informative reflecting the function of repetition by using more varieties of words and meanings and giving primacy to the informative

An example of functional recurrence occurs in surat al-Waaqi’ah (Q 56, 10):

Wa-l-saabiqoon al-saabiqoon ‘ulaa’ika l-muqarraboon.

According to the Quran exegesis by al-Tabari (Tafsir al-Tabari, 2000), the foremost in doing good (early Muslims i.e the Muhajireen ‘migrants’) are the foremost in their reward in the hereafter. On the other hand, Ibn Katheer (1993) states that the saabiqoon al-saabiqoon are the prophets, martyrs and companions of the prophets although both include other categories such as those who race to the mosque for prayer, the first in doing good deeds and the most fearing of God. Ibn Katheer draws an analogy with verse 21 in surat al-Hadeed wherein the verb saabiqoo ‘race, be foremost’ is addressed to all Muslims:

Be ye foremost (in seeking) forgiveness from your Lord, and a Garden (of Bliss), the width whereof is as the width of heaven and earth (Ali, 1989, p.1504)

Yet, three of the five interpretations of the Quran render the recurrence literally as if it were redundant.

- Pickthall: ”And the foremost in the race, the foremost in the race.”
- Shakir: ”And the foremost are the foremost.”
- Arberry: ”And the Outstrippers: the Outstrippers.”

Only Asad and Ali provide lexical insertions to explain the reference to the exegesis:

- Asad: ”But the foremost shall be [they who in life were]

the foremost [in faith and good works]”

- Ali: ”And those Foremost (in Faith) will be Foremost (in the Hereafter).”

In the following example, functional recurrence is used in the context of emphasis, intimidation and warning of the situation on the Day of Reckoning (Hannouna, 2010, p.92).

Kulla idhbaa dakkat al-ardu dakkat dakkat

“When the earth is pounded repeatedly and crushed (into pieces)”

Far from being pleonastic, the repetition of the word داکت dakkat is first done as a case of partial recurrence in relation to the verb داکت dakkat. Thus the first occurrence of داکت dakkat constitutes a grammatical case of cognate accusative which is rendered in English by an adjectival or adverbial intensifier. Therefore, the mere repetition of the word in the TT renders it void of its grammatical and semantic function as we find in the translation by Asad and Pickthall:

- Asad: ”Nay, but [how will you fare on Judgment Day] when the earth is crushed with crushing upon crushing.”
- Pickthall: ”Nay, but when the earth is ground to atoms, grinding, grinding.”

However, Shakir, Ali, Arberry and Irving use adverbial intensifiers and/ or other synonyms in order to preserve the grammatical and semantic function of the cognate accusative and reproduce the same degree of effectiveness of the SL text.

- Shakir: ”Nay! When the earth is made to crumble to pieces.”
- Ali: ”Nay! When the earth is pounded to powder.”
- Arberry: ”No indeed! When the earth is ground to powder.”
- Irving: ”Indeed when the earth has been completely flattened out.”

The verse also includes a complete recurrence in داکت dakkat dakkat dakkat (literally, “a bang after a bang”) denoting that the earth will be pounded repeatedly, forcefully and may be for quite a long time until it is ground to powder. Indeed the onomatopoeic segmental sounds داکت dakkat dakkat emulate the action of constant and loud banging which emphasizes the emphatic function of ‘warning’ and ‘threatening’ regarding the woes on the Day of Reckoning. In order to preserve the ‘aesthetic’ function along with the emphatic one we may suggest a combination of recurrence and the insertion of an intensifier:

Indeed! When the earth is repeatedly pounded and pounded until it is completely flattened out.

Further, the aesthetic parallelism and the rhyming repetition of داکت dakkat dakkat and صفا صفا saffan saffan [rank on
rank] accentuate the semantic contrast in the verse; thus after
anarchy there comes order.

In surat al-Mursalat (Q 77, 1-5)

والمرسلات عرفا، فالعاصفات عصفا، والنشرات نشرًا، فالفرنسات فرقًا

- Ali: “By the Winds sent forth one after another (to
man’s profit) which then blow violently in
tempestuous gusts, and scatter (things) far and
wide, then separate them, one from another.”
- Irving: “By the [winds] sent forth for a purpose and gales
that rage on and on, scattering things around; then
dividing them all up.”

The ST employs the cognate accusative as well as partial
and parallel recurrence in order to compensate for the missing recurrent words
in the TT. Consequently, it is an effective rhetorical and semantic device in Arabic that
cannot be labeled as redundant. In the following translation we
attempted to integrate some intensifiers into Ali’s translation in
order to compensate for the missing recurrent words in the TT.

“By the benevolent winds, which are sent forth one after another
And by the tempestuous winds that blow violently
By the winds that scatter things (clouds and pollen) far and wide
Then distinctly separate them, one from another.”

Ambiguity, Polysemy and Synonymy

One of the main obstacles to accurate translation is ambiguity
resulting from puns of SL homonyms which are of the same
form but of different meaning or polysemous words that refer
to a number of concepts in a context-free environment. In
non-sensitive texts the TL synonymous equivalents may be
substituted for each other without a drastic change of the factual
conditions or the core meaning of the overall text. In fact,
many Arabic literary works, sermons and orations are reputed
for their overuse of strings of synonyms and hendiadys for
the purpose of stressing the emotive aspect of the text or
explicating its meaning. Translating such parallel couplings
in the TL may look redundant as English does not tolerate
the proliferation of synonyms.

Since absolute synonymous equivalents in translation are rare,
partial synonyms are often substituted depending on their
denotative and connotative meaning (Bussmann et al., p.471).
At the lexical level, the semantic gradation of synonyms reflects
fine distinctions in their componential analysis, nuances, tones,
attitudes, etc. The first synonym may not replace the second
in the same context; sometimes nuances and attributes are used
instead of the core word as in the attributes أدمَ adham ‘black
horse’ and جواة jawaad ‘fast horse’ which are hyponyms of
the generic word حسان hisaan ‘horse’ (Shehab, 2009, p.87).
Consequently, TL equivalent(s) may not denote exactly the
same range of concepts for a given ST polysemous word.
The problem is aggravated in the presence of historical
references and cultural nuances as in the case of sacred texts.
Therefore, there are translation alternatives that different
translators may choose according to their own interpretation of context particularly when the cues from
the adjacent words are not decisive enough.

The word الخير al-khayr in the verse واَيَنَّمَا هوُنَاءُ لِلْخَيْرِ wa‘innahu li-habbi l-khayri la-shadeed is a good example of
it the correct equivalent of ‘wealth’, Turner (1997, p.370)
provides a wrong translation as ‘fast horses’ whereas Arberry
(1980, vol 2, p.349) gives an inappropriate meaning of ‘good
things’. As for the Arabic carriers المفتوعون al-muttaqoen (Q 2, 2), it is rendered by
Bell (1937, vol 1, p.3) as ‘those who act piously’, Pickthall (p.24)
‘those who ward off (evil)’ Asad (p.3) ‘the God-conscious’,
Arberry (vol 1, p.30) ‘god-fearing’ and by al-Hilali and Khan
(p.3) as “those who are al-muttaqoon” and it is explicated in a
long paraphrase as

“the pious and righteous persons who fear Allah much (abstain
from all kinds of sins and evil deeds which He has forbidden)
and love Allah much (perform all kinds of good deeds which
He has ordained.).”

Abdul-Raof’s (2004) survey of existing English versions of the
Quran shows that the most a translator aims at is the
communication of the message without considering the
idiosyncrasies and prototypical features of the Quranic
discourse. The versatility of Quranic lexemes and styles were
not captured in most of the English versions of the Quran.
For example, the fine subtleties of Quranic synonymous
nuances are best expressed in the words سنة sana and ‘aam which are both rendered as ‘year’ despite the fact that
sana is often associated with suffering, perseverance and
agony while ‘aam is occasionally used in the context of
benevolence and good deeds. This lexical void in English
results in under- translating the implications of the Arabic
verse. For example, سنة sana is used with a negative sense to
imply a long life of misery and affliction that will not benefit
those who cling to life.

Yawaddu’ al-ahadhum law yu’ammara alfa sanatin wamaa
hawa bi-muzahziihi mina l t-‘adhabbi (Q 2, 9).

- Asad: every one of them would love to live a thousand years,
although the grant of long life could not save him from
suffering (in the hereafter).
- Ali: Each one of them wishes He could be given a life of a
thousand years: But the grant of such life will not save him from (due) punishment.
A similar sense of loss and agony is expressed by the word *sana* when the children of Israel were afflicted with forty years in the wilderness.

Qura al-fā’-innahāa mūhāramatun ‘alayhim arba’eeena sanatun yateehoona fee-l-‘ardī fala’aa ta’śa ‘ala l-qawmi l-faasīqeem (Q 5, 26).

- Asad: Answered He: Then, verily, this [land] shall be forbidden to them for forty years, while they wander on earth, bewildered, to and fro; and sorrow thou not over these iniquitous folk.

- Ali: Allah said: Therefore will the land be out of their reach for forty years: In distraction will they wander through the land: But sorrow thou not over these rebellious people.

Yet, the word عام *aam* is associated with a promising year of bounteous harvest.

ئم يأتي من بعد عام عام بعث الناس وفيه نصر

*Thumma ya’tee min ba’di dhaaliika ‘aamun feehi yughathu l-naasaa wa-feeth ya’ siroon* (Q 12, 49).

- Asad: And after that will come a year in which the people will be delivered from all distress, and in which they will press [oil and wine as before].

- Ali: Then will come after that (period) a year in which the people will have abundant water, and in which they will press (wine and oil).

In a similar vein, the Arabic words *yas* and *qunoot* are partial synonyms since they differ in degree. *Yas* implies the ordinary state of being hopeless or desperate while *qunoot* is a more intense level of losing hope and being ‘truly desperate, utterly wretched, totally despondent’ (*al-Mu’jam al-Waseet*, 2004; Ibn-Manzour, 1970; Shehab, 2009, p. 897). Yet, the English interpretations of the Qura do not reflect this distinction; both words are rendered as either 'become hopeless' or 'desperate' interchangeably with no special equivalent for *qunoot*. It would have been more accurate to use a lesser degree of intensity for *yas* such as 'frustrated', 'discouraged', 'dispirited', 'depressed' or 'dishheartened' while preserving 'despair' for *qunoot*. Otherwise, an intensifier should precede the word 'despair' when used for *qunoot*. Thus in surat *Yusuf* (Q 12), when Jacob encourages his sons to endure and be patient while searching for Joseph (al-Tabari, 2000, vol 16, p.233), he admonishes them not to be discouraged or frustrated for God's mercy is imminent, just a stone's throw away. As a prophet, with visionary perception, he is certain that God will never abandon them to despair. Yet, four translations use 'despair' while the fifth uses 'lose hope'.

ولا تائموا من روح الله إنه لا يبسين من روح الله إلا اللوم الكافرون.

*walaa tay’asoo min rawhi Allaahi innaha laa yay’asu min rawhi Allaahi illa al-qawmu al-kafiroon.* (Yusuf Q 12, 87)

- Asad: Do not lose hope of God's life-giving mercy: verily, none but people who deny the truth can ever lose hope of God's life-giving mercy."

- Pickthall: Despair not of the Spirit of Allah. Lo! none despaireth of the Spirit of Allah save disbelieving folk.”

- Shakir: Despair not of Allah's mercy; surely none despair of Allah's mercy except the unbelieving people.”

- Ali: Do not despair of God's mercy; none but those who deny the truth despair of God’s mercy.”

- Arberry: Do not despair of God's comfort; of God's comfort no man despair, excepting the people of the unbelievers.”

On the other hand, in verse 53 of surat *az-Zammar* God addresses those who have transgressed against themselves to believe in His mercy and not to be despondent by reaching the stage of utter despair. In this context, reaching the stage of 'utter despair' corresponds with reaching the extreme point of being 'extravagant' with oneself.

قُلِّ يَا بَنِي اَلْمَشْرِقِ الْأَمْغَدُ أَنْفَسُهُمْ نَقُلُوْنَ مِنْ رَحْمَةِ اللَّهِ

*Qul ya’-ibadiya illadheena asrafoo ‘alaan anfansihim laa taqnatoo min rahmati Allaahi (al-Zammar Q 39, 53).*

- Asad: SAY: [Thus speaks God:] 'O you servants of Mine who have transgressed against your own selves! Despair not of God's mercy.”

- Pickthall: Say: O My slaves who have been prodigal to their own harm! Despair not of the mercy of Allah.”

- Shakir: Say: O my servants! who have acted extravagantly against their own souls, do not despair of the mercy of Allah.”

- Ali: Say: O My Servants who have transgressed against their souls! Despair not of the Mercy of Allah.”

- Arberry: Say: O my people who have been prodigal against yourselves, do not despair of God's mercy.”

Pickthall, Ali and Shakir render the word *yawwaswis* in the verse من شر الوساوس الخناس الذي يوسوس في صدور الناس *min sharri al-waswaas al-khannaas* in *Yusuf* (Q 114, 4) as “whisper” which back-translates into Arabic as *yahmis* or *youswis* or *youswswish* “to murmur in a soft voice” (Baalbaki, al-Mawrid 2000, p.1210). The connotations of the word *yawwaswis* extend to include the devil's secretive incitements, the inner self as it provokes man to commit sin and the iconic jingle of rattling jewelry. Since there is no exact one-to-one equivalent in the English lexicon, the equivalent “to whisper” lacks the essential connotations of the Arabic verb that include evil and incitement and the aesthetic 'hissing' sound of the ST that imply plotting in secrecy. Further, the word *yawwaswis* may indicate mute incitements of the inner self. Contrary to the all-negative sense of the Arabic word *yawwaswis* that collocates with the devil, the English verb ‘to whisper’ may include a positive sense. In addition to “speaking quietly and
privately, as by way of gossip, slander, or intrigue” Collins Dictionary lists other definitions that associate with the rustle of leaves (Collins English Dictionary, 2011). In order to restrict the translation to the negative connotations of ‘whisper’, the three most popular translators of the Quran insert lexical modifiers:

- Ali: From the mischief of the Whisperer (of Evil), who withdraws (after his whisper).
- Pickthall: From the evil of the sneaking whisperer.”
- Shakir: From the evil of the whisperings of the sinking (Shaitan).”

Polysemous words may create ambiguous word puns if used in successive recurrence in the same verse. Thus, in surat Al-Roum, verse 55

وَيُؤْمِنُونَ السَّاعَةَ يُقسمُ المُحْرُومُونَ سَلَا طُورًا غَيْرَ سَاعَةً Wa-yawma taqoomu l-saa’a yaqisma al-mujrimoona maa labithoo ghayra saa’a, the translators attempted to recreate the pun in the target renderings by repeating the same word سَاعَةٌ while capitalizing the initial H in the first ‘Hour’ which refers to ‘Judgement Day’. This verifies the knowledge of the translators of the wordplay in the Quran (Dastjerdi, 2011, p.139).

- Asad: “And when the Last Hour dawns, those who had been lost in sin will swear that they had not tarried [on earth] longer than an hour.”
- Pickthall: “And on the day when the Hour riseth the guilty will vow that they did tarry but an hour.”
- Shakir: “And when the hour shall come, the guilty shall swear (that) they did not tarry but an hour.”
- Ali: “On the Day that the Hour (of Reckoning) will be established, the transgressors will swear that they tarried not but an hour.”
- Arberry: “Upon the day when the Hour is come, the sinners shall swear they have not tarried above an hour.”

Under-translation of Polysemns

The referential versatility of Quranic lexemes undergoes semantic reduction when Quranic translators render a polysem as a monosem. For example, the word al-falaq (Q 113, 1) is translated as “daybreak” by Pickthall and Arberry, “dawn” by Asad, Shakir and Ali whereas it can be generally used to refer to the process of splitting as in cell multiplication including seeds, molecules and biological entities (Abdul-Raof, 2004). Likewise, the primary meaning of the word خَشَى is “to be humble, submissive, pious and devout [as in prayer]” (al-Mawrid Arabic English Dictionary), while in the exegeses it is assigned a secondary sense of ‘being desolate, barren’ (Ibn Kathheer, 1993, p.182).

This is attested to in verses 1-2 of al-Mu’minun (The Believers Q 23):

Qad aflaha al-mu’minun allatheen hum fee salaathim khashi’oon

Asad: “Truly, to a happy state shall attain the believers those who humble themselves in their prayer.”

The same word is used both literally and metaphorically in verse 39 of Fusstilat where a desolate earth is compared to a human being in a state of submissive worship praying to God to elevate a calamity.

وَمَنَ أَيَّتَاهُ أَنْتُوَ نَ نَ أَلْرَأَيْنَا عَلَيْهِ أَنْمَأَ أَهَتَّرَ وَرَبَتٍ Wa-min aayaathii annaka ta’ar-radha khaashi’atan fa’idhaa ‘anzalna ‘alayhaa al-maa’a iihtazzat wa-rabat (Fussitilat Q 41, 39)

With the exception of Pickthall, the other most popular interpretations of the Quran fail to render the common meaning of khaashi’atan as ‘humble’ or ‘submissive’.

- Asad: “For among His signs is this: thou seest the earth lying desolate — and lo! When We send down water upon it, it stirs and swells [with life]!”
- Pickthall: “And of His portents (is this): that thou seest the earth lowly, but when We send down water thereon it thrilleth and growtheth.”
- Shakir: “And among His signs is this, that you see the earth still, but when We send down on it the water, it stirs and swells.”
- Yusuf Ali: “And among His Signs in this: thou seest the earth barren and desolate; but when We send down rain to it, it is stirred to life and yields increase.”
- Irving: “Among his signs, you see how desolate the earth is; yet whenever we send water down upon it, it stirs and sprouts.”

The earth, heavens, animate and inanimate objects (birds, trees, mountains, thunder) are treated in the Quran as living beings that pray and understand when spoken to by God and his messengers. It is narrated that when prophet Mohammad (PBUH) was ascending the pulpit, a nearby tree trunk started moaning and groaning upon hearing the words of revelation. Instances of personification of inanimate objects are present in several verses. Thus in al-Dukhuan (Q 44, 29) the sky is assigned a human trait of weeping:

فَمَا كَبَّتْ عَلَى الْشَّمَاعَةِ وَالْأَرْضِ وَمَا كَانَ مُتَفَروْنَ Fama bakat ‘alayhimu l-samaa’u wal-ardu wamaa kanaa mutafroon

Law anzalna hadha alqur’aan ‘alaab jaabilin la-ra’ayahu khashi’an mutasaddi’an min khashyati Allaaah

“Had We sent down this Quran on a mountain, verily, thou wouldst have seen it humble itself and cleave asunder for fear of Allah” (Ali).
To exclude TL synonyms other than ‘desolate’ and ‘barren’ for the word khaashi’atan constitutes a case of divergence from the ST by way of under-translation.

Johnstone (1991, p.177) propounds that instead of the logical structure of proof which Westerners see behind the words, Arabic uses repetition as a means of assertion and persuasion. Ali, however, refutes Johnstone’s argument by stressing that far from being a mere rhetorical device, the wording of the Quran is deliberate; every word serves a purpose; and deformation of the text’s original meaning can occur if the repetition is not adequately catered for in the translation (Ali 2006, p.26). Yet, Ali erroneously cites an example of polysemy in surat Yusuf as a case of repetition.

In the verse (Yousef Q 12, 4):

‘איד qaala yosufu لي-abeehi innee ra’aaytu ahada ‘ashara kawkaban wa-l-shams wa-l-qamar ra’aaythum lee saajideen.

O my father! Lo! I saw in a dream eleven planets and the sun and the moon, I saw them protruding themselves unto me.

Ali finds that the repetition of رأيت ra’aaytu ‘I saw’ indicates that there was not the least doubt in Joseph’s mind that what he saw was real and not just a normal dream (Ali, 1991, p.27). The word رأى in Arabic may serve as the triliteral verbal stem for both رؤية ru’yaa ‘seeing’ by means of physical eyesight and روأية ru’ya’aa “conceiving a vision of future events while asleep” (al-Munjid, p.243). This is attested to by Joseph’s father’s answer not to tell his brothers about his ‘visionary’ dream: orooyak ru’ya’aa (Q 12, 5). Thus a visionary dream is more significant than a casual dream or as it is termed أضحاى أحلام adghathu ahlam “A confused medley of meaninglessly dreams and nightmares of no particular significance” according to surat Yousef (Q 12, 44)

قالوا أضحاى أحلام وما نحن بتأويل الأحلام بعمالين qauloo adghhaathu ahlam wa-maa nahnu bi-ta’weeli l-ahlam bi-‘aaalimeen.

They said: A confused medley of dreams: and we are not skilled in the interpretation of dreams.”

In this verse, the repetition of the verb رأيت ra’aaytu is not as Johnstone (1991, p.29) claims simply a rhetorical device merely intended to persuade the readers by creating a logical link between the anterior and posterior parts of the verse, but rather it emphasizes that what Joseph saw was more like a dream come true. The repetitive nature of his language is preceptive to an actual predesigned by God’s will as testimony to Joseph’s prophethood (Ali, 2006, p.27).

Yet, the four most popular translations of the Quran fall short from realizing the polysemous nature of رأيت ra’aaytu. Shakir and Ali simply repeat the verb ‘I saw’ while Asad and Pickthall insert the word dream.

- Asad: “Lo! Thus spoke Joseph unto his father: “O my father! Behold, I saw [in a dream] eleven stars, as well as the sun and the moon: I saw them protrude themselves before me!”

- Pickthall: “When Joseph said unto his father: O my father! Lo! I saw in a dream eleven planets and the sun and the moon, I saw them protruding themselves unto me.”

- Shakir: “When Yusuf said to his father: O my father! Surely I saw eleven stars and the sun and the moon-- I saw them making obeisance to me.”

- Yousef Ali: “Behold! Joseph said to his father: O my father! I did see eleven stars and the sun and the moon: I saw them protrude themselves to me!”

Finally, the word أكرف iqtarafa is often used in the context of committing a sin or perpetrating a criminal act. Nevertheless, in surat al-Tawbah it is used with money to imply that it is a base earthly gain that should not deviate man from the true love of God.

قل إن كان آباؤكم وإخواؤكم وأزواجكم وعشيركم وأموال اقترفتموها وتجارة نحسن ككسبها ومكاسب ترزونها أحب إيمانكم الله. Qul in kaana aabaa’ikum wa-abnaa’ikum wa-ikhaawakum wa-ahzabakum wa-anwaa’dun iqtaaraftum noohaa wa-tijaaraatun takhtashwaa kasaadaaha wa-musaukinu taddawnhaaa ahabbanana ilaykum mina Allaahi. (Q 9, 24).

Almost all the translations given by the five well known interpreters erroneously render the word iqtarafa by a more euphemistic equivalent such as ‘acquire’ or ‘gain’ thus glossing over the negative nuance of the ST word.

-Asad: Say: If your fathers and your sons and your brothers and your spouses and your clan, and the worldly goods which you have acquired, and the commerce whereof you fear a decline, and the dwellings in which you take pleasure — [if all these] are dearer to you than God.

-Ali: Say: If it be that your fathers, your sons, your brothers, your mates, or your kindred; the wealth that ye have gained; the commerce in which ye fear a decline: or the dwellings in which ye delight — are dearer to you than Allah.

-Pickthall: Say: If your fathers, and your sons, and your brethren, and your wives, and your tribe, and the wealth ye have acquired, and merchandise for which ye fear that there will be no sale, and dwellings ye desire are dearer to you than Allah.

Determining Polysemy by Means of Collocation

Some cases of formal recurrence of polysemous words may be misleading to the translator if he ignores their subtle nuances and decides to repeat them in the TT, unless the context and other adjacent collocates dictate a different rendering. A case in point is surat al-Rahmaan (Q 55) wherein the polysemous word al-meexaan occurs in three consecutive verses with synonymous variations in meaning. Thus, in verse 7 it stands for both the actual balance in creating the skies and all creation with delicate
measurement and the balance of justice in reward and punishment, conviction and vindication.

Wa-l-sama’a rafa’ahaa wa-wada’a al-mezea’ an taghoo fee al-mezea’an wa-aqemoo al-wazna bi-l-qisti walaa tukhsiroo al-mezea’.

The collocation of the word *taghoo* ‘transgress’ and the measure *al-mezea’an ‘balance, equity, justice’ in verse 8 would narrow the choices for the translator in favour of ‘equity’ or ‘justice’ since, contrary to celestial justice, earthly tyrants may do injustice by encroaching on and contravening others’ rights. However, in verse 9 the association between the collocates *qist* ‘fair or exact measurement’ and *tukhsiro* ‘deprecate, reduce/ decrease in the scale as a measuring instrument, skimp the balance’ would incline the translation towards the primary meaning of the measure *al-mezea’an as the ‘instrument’ with which one weighs although the sense of establishing justice and equity cannot be excluded.

With the exception of Asad, the other four popular translators of the Quran tend to indiscriminately repeat the word ‘balance’ or ‘measure’ with little or no intertextual comments to help the reader understand the implications of the recurrence in light of the adjacent collocates.

- Asad: “And the skies He has raised high, and has devised [for all things] a measure, so that you [too, O men,] might never transgress the measure [of what is right]: weigh, therefore, [your deeds] with equity, and cut not the measure short!”
- Ali: “And the Firmament has He raised high, and He has set up the Balance (of Justice). In order that ye may not transgress (due) balance. So establish weight with justice and fall not short in the balance.”
- Pickthall: “And the sky He hath uplifted; and He hath set the measure, that ye exceed not the measure, But observe the measure strictly, nor fall short thereof.”
- Shakir: “And the heaven, He raised it high, and He made the balance, That you may not be inordinate in respect of the measure. And keep up the balance with equity and do not make the measure deficient.”
- Arberry: “And heaven -- He raised it up, and set the Balance. Transgress not in the Balance, and weigh with justice, and skimp not in the Balance.”

On the other hand, some words may be erroneously rendered as synonymous when considered in isolation. Out of context, the pair *ar-rithq* and *al-riyaah* may be mistaken for absolute synonyms since the latter is the plural form of the former (Shehab, 2009, pp.880-1). Yet in the following verse:

Wa-amma ’a‘adum fa-‘uhlako bi-reehiin sarsarin ‘aatiya (al-Haaqqah, Q 69, 6)

The presence of the collocate *‘aatiya* “tempestuous, fierce” narrows the sense down to that of an unfavourable wind.

- Asad: “And as for the ‘Ad - they were destroyed by a storm wind furiously raging.”
- Ali: “And the ‘Ad, they were destroyed by a furious Wind, exceedingly violent.”
- Pickthall: “And as for A’ad, they were destroyed by a fierce roaring wind.”
- Shakir: “And as to Ad, they were destroyed by a roaring, violent blast.”
- Arberry: “And as for Ad, they were destroyed by a wind clamorous.”

As the above translations indicate, *ar-rithq* is used in the Quran to implicate torment and destruction and hence can be translated ideationally as “fierce, violent wind, raging storm” and functionally as “gale” (Shehab, 2009, p.887). Yet, the word *al-riyaah* in verse 48 of surat al-Room carries a different nuance as “blessing winds”.

Allahu alladhee yursila l-riyaaha fatuteheeru sahaaban fa-yabsutuhu fee l-sama’a’i kayfa yasha’u wa-yaf’aluhu kisafan fataara l-wadqa yakhrhuu min khilaalih.

- Asad: “It is God who sends forth the winds [of hope], so that they raise a cloud - whereupon He spreads it over the skies as He wills, and causes it to break up so that thou seest rain issue from within it.”
- Ali: “It is Allah Who sends the Winds, and they raise the Clouds: then does He spread them in the sky as He wills, and break them into fragments, until thou seest rain-drops issue from the midst thereof.”
- Pickthall: “Allah is He Who sendeth the winds so that they raise clouds, and spreadeth them along the sky as pleaseth Him, and causeth them to break and thou seest the rain downpouring from within them.”
- Shakir: “Allah is He Who sends forth the winds so they raise a cloud, then He spreads it forth in the sky as He pleases, and He breaks it up so that you see the rain coming forth from inside it.”
- Arberry: “God is He that looses the winds, that stir up clouds; and He spreads them in heaven how He will, and shatters them; then thou seest the rain issuing out of the midst of them.”

With the exception of Asad’s ideational translation where the word ‘winds’ is post-modified by ‘of hope’ none of the other translators uses any adjective to implicate that unlike *ar-rithq* these are benevolent winds of blessings and bounties. The textual clue is offered in the adjacent word ‘rain’ and the word ‘rejoice’ in the following verse line. Even though the word ‘winds’ is a reasonable equivalent to *al-riyaah* as both words share the same sense of moving or stirring up the clouds and sending down rain, yet, since we are dealing with
a Quranic text where slight differences of lexical items do count, it could be more faithful if we reflect the difference based on adjacent words in the immediate context (Shehab, 2009, p.880-1).

Similarly, Farghal (2010, p.173) notes that Arberry undertranslates the Quranic euphemistic term ‘uddah’ the legally prescribed period of three months before a divorced woman can remarry, in order to rule out pregnancy as simply ‘period’ which can be easily confused with ‘menstrual period’.

Ya-‘ayyuhu l-nahiyyu idhaa illaqtumu l-nisaa’af-talliioothumma li-‘iddathihtuma wa-ahssuu l-i‘iddata wa-taqoo Allaaha rabbakum.

- Arberry: O Prophet [Mohammad] when you divorce women, divorce them when they have reached their period. Count the period, and fear your lord.

The collocations of divorce help the ST reader determine the sense of ‘period’ as that of conception rather than the monthly menstrual period. The translator could have mediated by explicating the equivalent in favour of the TT recipient.

Determining Polysemy and Synonymy by Morphological Form and Textual Adjacency

Arabic employs subtle morphological distinctions in the patterns of word formation; a single diacritic (short vowel) may lead to significant semantic differences as illustrated in the following example.

In surat al-Kafiroon (Q 109), the word عابدون ‘aabidun is repeated twice in successive verses (3, 5).

Qul yaa-‘ayyuhu l-kaafiroon
“Say: O disbelievers!”

I do not worship that which ye send your beasts to pasture.

And they swear by God that they belong with you, but they are not of you; yet they are afraid (to repudiate in the latter part of the verse that the hypocrites do not belong to Muslims.

The verb يحلف yahlif is used in the Holy Quran in the context of the hypocrites severing their oath whereas the verb أقسم usim is used in honest, sincere oaths. Since there is no correspondent verb other than ‘swear’ in English to relay this delicate difference between the two synonyms, we may resort to ideational equivalence such as “untruthfully swear” for يحلفوون and “truthfully swear” for أقسم (Shehab, 2009, p.881). Thus in surat al-A’raaf (Q 7, 21) and Qasasumma bi Matthew (Q 5, 33) the translator laa akhaliqum minna lakin al-naasheen wa-qaasamhumma innee lakumaa lamin al-naasheen “And he swore to them both, that he was their sincere adviser” the verb ‘swear’ is intended in the positive sense of ‘taking a solemn oath’.

Nevertheless, the negative sense of ‘dishonest, untruthful oath’ in surat al-Tawbah (Q 9, 56) is congruent with the repudiation in the latter part of the verse that the hypocrites do not belong to Muslims.

wa-yahlifooon bi-lilaahi innahum la-minkum wa-maa-hum minkum wa-laakinnahum qawmum yaqraafoon

Yet, none of the five translations uses any qualifying modifiers such as ‘dishonestly’ or ‘deceitfully’ before the word ‘swear’ to reflect this implication.

- Asad: “And they swear by God that they do indeed belong to you -the while they do not belong to you, but are [only] people ridden by fear.”
- Pickthall: “And they swear by Allah that they are in truth of you, when they are not of you, but they are folk who are afraid.”
- Ali: “They swear by Allah that they are indeed of you; but they are not of you: yet they are afraid (to appear in their true colours).”
- Shakir: “And they swear by Allah that they are most surely of you, and they are not of you, but they are a people who are afraid (of you).”
- Arberry: “They swear by God that they belong with you, but they are not of you a people that are afraid.”

The word ماء ‘water’ is frequently used in the Quran to refer exclusively to ‘graceful, nourishing rain’

هو الذي أنزل من السماه ماء لكم من شراب ومنه نحر فيه تسيمون.

Hawa ilathe anzala mina l-sama’i maa’an lakum minhun sharabun waminhu shajarun faeehi tuseemoon (Q 16, 10).

With the exception of Ali, the other four translators preferred to use ‘water’ rather than ‘rain’ in order to reflect the benign nature of this kind of rain in juxtaposition with ‘destructive rainstorms’.

- Asad: “It is He who sends down water from the skies; you drink thereof, and thereof [drink] the plants upon which you pasture your beasts.”
- Pickthall: “He is Who sendeth down water from the sky, whence ye have drink, and whence are trees on which ye send your beasts to pasture.”
As with the synonym to modify it with adjectives or explicating phrases.

Although المطر matar is often used as the neutral superordinate or hypernym word, yet in the Quran it is also used in the context of a penalty imposed by God for wrongdoing (Shehab, 2009, p.881-2) as in verse 58 of surat al-Naml (Q 27) where the rain is described as ‘evil’ and ‘dreadful’.

Although المطر matar is often used as the neutral superordinate or hypernym word, yet in the Quran it is also used in the context of a penalty imposed by God for wrongdoing (Shehab, 2009, p.881-2) as in verse 58 of surat al-Naml (Q 27) where the rain is described as ‘evil’ and ‘dreadful’.

The peculiar sense of المطر ghayth as ‘relief’ is implied in the adjacent words in the context (after they have despaired, unfolds his mercy, grace). The translations of this verse invariably render the word المطر ghayth as ‘rain’ albeit Pickthall adds a qualitative adjective ‘saving’.

- Asad: “And it is He who sends down rain after [men] have lost all hope, and unfolds His grace…”
- Pickthall: “And He is who sends down the saving rain after they have despaired, and spreadeth out His mercy…”
- Ali: “He is the One that sends down rain (even) after (men) have given up all hope, and scatters His Mercy (far and wide)…”
- Shakir: “And He it is Who sends down the rain after they have despaired, and He unfolds His mercy…”
- Arberry: “And it is He who sends down to you out of heaven water of which you have to drink, and of which trees, for you to pasture your herds.”

The peculiar sense of المطر ghayth as ‘relief’ is implied in the adjacent words in the context (after they have despaired, unfolds his mercy, grace). The translations of this verse invariably render the word المطر ghayth as ‘rain’ albeit Pickthall adds a qualitative adjective ‘saving’.

Although المطر matar is often used as the neutral superordinate or hypernym word, yet in the Quran it is also used in the context of a penalty imposed by God for wrongdoing (Shehab, 2009, p.881-2) as in verse 58 of surat al-Naml (Q 27) where the rain is described as ‘evil’ and ‘dreadful’.

The peculiar sense of المطر ghayth as ‘relief’ is implied in the adjacent words in the context (after they have despaired, unfolds his mercy, grace). The translations of this verse invariably render the word المطر ghayth as ‘rain’ albeit Pickthall adds a qualitative adjective ‘saving’.

- Asad: “And it is He who sends down rain (of brimstone); and evil was the shower on those who were admonished (but heeded not)!"
- Shakir: “And We rained on them a rain, and evil was the rain of those who had been warned.”
- Arberry: “And We rained on them a rain; and evil indeed is the rain of them that are warned.”

Other synonyms for المطر matar include صيب sayyib which is used in surat al-Baqarah (Q 2, 19) with the sense of a violent and destructive rainstorm that frightens the disbelievers.

Yet, the renditions given by the five translators of the Quran fall short of finding an equivalent synonym in English and instead insert other lexical modifiers.

- Asad: “Or [the parable] of a violent cloudburst in the sky, with utter darkness…”
- Pickthall: “Or like a rainstorm from the sky, wherein is darkness…”
- Ali: “Or (another similitude) is that of a rain-laden cloud from the sky: In it are zones of darkness…”
- Shakir: “Or like abundant rain from the cloud in which is utter darkness…”
- Arberry: “Or as a cloudburst out of heaven in which is darkness…”

In all the above examples, the morphological form of the word, the adjacency of collocates and other modifiers (adjectives and explicating phrases) within the same context narrow down the nuances of polysemous words and help the translator in eliminating redundant synonyms.

**Conclusion**

This paper has focused on the issue of translating polysemous words and their recurrence in the Quran with different nuances in adjacent contexts. By analyzing the corpus of examples of the various English interpretations of the Quran we realized that some deviations and undertranslations are the result of insufficient reference to the exegeses of the Quran, lack of understanding of Arabic morphology and inability to decode the nuances of polysemous words. If translators choose to undertranslate by ignoring the nuances and connotations of polysemous and recurrent words, they would fail to accommodate all the meanings of the original; this is because synonyms, polysemes and repeated words in the Quran serve a purpose. Instances of recurrence may either be repeated formally or erroneously interpreted as semantic redundancies in the TT. In order to maintain the informative and aesthetic functions of recurrent Quranic words and phrases, translators should attempt to reproduce them in approximate functional
equivalents or compensate their deletion with lexical insertions, annotations or ideational equivalents.

It should be noted that, unlike English, Arabic uses extended cognitive synonyms and recurrences of polysemous words. When it comes to translating non-sensitive texts, some translators may not find the urgency to preserve the subtle differences which exist among such synonyms and recurrences. Yet, upon dealing with sensitive and religious texts, a translation solely based on the conceptual and denotative meaning of synonymous or polysemous words may be incongruent with their connotations and implications. So, in order to relay the exact implicated meaning of the ST, one may resort to ideational or annotated renditions wherein reference should be made to the exegeses, books of prophetic traditions and Arabic heritage dictionaries. Thus, text-type is paramount in deciding what translation equivalence translators should opt for.

The analyses of recurrence cases in the present study indicate that the translations of the Quran by Ali, Asad and Irving show less repetition and more annotation. They focus on reflecting the function of recurrence by using more varieties of words and meanings and giving primacy to the informative over the aesthetic aspect of the holy text. In comparison, Pickthall’s, Arberry’s and Shakir’s are more literal as they show less repetition and more annotation. They focus on the translations of the Quran by Ali, Asad and Irving show less repetition and more annotation. They focus on reflecting the function of recurrence by using more varieties of words and meanings and giving primacy to the informative over the aesthetic aspect of the holy text. In comparison, Pickthall’s, Arberry’s and Shakir’s are more literal as they attempt to be more economical by preserving the same forms and wordings of the ST. Their translations include a reproduction of the ST complete and partial recurrences which at times sound semantically redundant and less informative than the ST owing to the incomparability between the ST and the TT in the nuances of recurrent polysemous words.

Sinonimu vartojimas verējant Koraną yra sudėtingas Klausimas, todėl atsiranda skirtingos šventojo teksto interpretacijos ir skirtingojo vertimų. Nesvarbu kaip tiksliai ir profesionaliai vertėjas stengiasi vertinti Korano tekstą, vertime visada gausu netiksliumų ir nukrypimų nuo jautrių teologinių, kultūrinių ir istorinių kontekstų, atsiradusių dėl ypatinio kūryabinio mechanizmo, semantikos ir sintakses neaiškumo, prozodinių ir akustinių broličių, specifines retomikos tekstūros ir kultūrinės informacijos gausos. Todėl daugelyje Korano vertimų į anglų kalbą neekvivalentiškumo ir neišverčiamumo atvejai yra dažni, juose balansuojama ant neaiškumo, dviprašmingumo ir miglotumo ribos. Yra tendencija pripažinti tokius Korano vertimus, kurie remiasi jo aiškinimu ir komentariumi. Kadangi nėra vienąsios egzegezės knygos, vertimai yra laikomi Korano aiškinimais ir aproksimacijomis neprisiminkusių musulmonų

Šiame tyrime atliekamas strategijų ir kriterijų, kuriuos naudojo išvadų Korano vertėjai, vertinimas, parenkant sinonimus, skirtus perteikti Korano tekstų daugiaeiškiems žodžiams. Analizuojama originalaus polisemantinio šaltinio teksto žodžio lingvistinis kultūrinis kontekstas ir lyginamas su vertimojo teksto artimais sinonimais. Tyrime teigiama, kad verējant religininius tekstus, kuriuose sinonimai paprastai yra vartojami perteikti implikuotoms šaltinio tekstų daugiaeiškioms reikšmėms ir kuriuose mes siekime padaryti tą patį poveikį vertimo teksto skaitytojui kaip ir originalusis tekstas, funkcinis sąvokos ekvivalentiškumas gauna pirmenybę prieš formalųjį ekvivalentiškumą.
